### How to clean and maintenance

1. When the helmet is used for a long time, dirt will often accumulate inside the helmet and there will be odors. In such cases, it should be cleaned. The cleanser used is neutral, and shampoo is better. To avoid odors from cleaning agents, control their use. When brushing the inside of the helmet, do not use too much force, otherwise it will deform the cushioning material and lose its function. After cleaning, wipe off the moisture with a towel or paper and air dry in a ventilated place. Do not use a hair dryer.

2. The helmet surface is more prone to dirt, so wiping the surface is a common task. When the helmet is stained, first wipe the stain with a damp cloth, and then wipe it with water wax or polishing wax to make the helmet clean and shiny. Also can use helmet-specific brightener, its effect is better. Do not use strong corrosive items, such as Tian-na water, sulfuric acid, etc.

Away from high temperatures:  
The helmet can be damaged if exposed to high temperatures in excess of 65.5 degrees Celsius. As a result, deformation occurs to helmet, and helmet will be blistered or unevenness appear.

The KY-Z002 helmet has a service life of 5 years. It is recommended to replace the helmet every 5 years if there is no collision damage in normal use.

Caution: Changes or modifications of this product is not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference
- (2) This device must accept any interference received, including interference that may cause undesired operation.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.
